

FALL 2005 PLANT PATHOLOGY SEMINAR
Mondays – 4:10 PM – Johnson Hall 343

- August 22** **No seminar--orientation**
- August 29** **Dr. Jack Rogers - "Needle Diseases of Conifers"**
- September 5** **University Holiday (Labor Day)**
- September 12** **Dr. Hajime Akamatsu - "Molecular genetics of host-specific toxin biosynthesis and pathogenicity of *Alternaria alternata* pathogens."**
- September 19** **Dr. Ekaterini Riga - "Beneficial and Harmful Nematodes in Washington State Agriculture"**
- September 26** **Catalina Leger - "Evaluation of entomopathogenic nematodes and green manures for control of cabbage maggot, *Delia radicum*"**
- October 3** **Dr. Scott Nuismer - Department of Biological Sciences, University of Idaho, "Host-parasite interactions and the evolution of ploidy"**
- October 10** **Jonathan Minch - "Association of double-stranded RNA elements and their effects on fungal virulence"**
- October 17** **Donna Henderson - "Parasites and pathogens of plant parasitic nematodes"**
- October 24** **Hui Hou - "Seed transmission of Pea Seed-Borne Mosaic Virus in pea"**
- October 31** **Ned Klopfenstein, Mee-Sook Kim and John Hanna - "Genetic relationships within and among North American *Armillaria* species"**
- November 7** **Dr. Gary Chastagner - "Sudden Oak Death"**
- November 14** **Dr. Colin Wellings, Plant Breeding Institute, University of Sidney, Australia, "Stripe rust epidemiology and control in Australia"**
- November 21** **Thanksgiving Break**
- November 28** **Dr. Ashraf, Department of Biological Sciences, Quaid-I-Azam University, Islamabad, Pakistan, (title to be announced later)**
- December 5** **Jessica Gigot - "The survival and transmission of *Phytophthora infestans* on volunteer potatoes"**
