This form must be filled out completely. Follow instructions on the back of this form for sending samples. Please send sufficient material to show the complete range of symptoms. Photos may be e-mailed to plant.clinic@wsu.edu.

Plant/Crop affected:	Variety: (if known)
Location of planting (street, city, county, latitude/longitude, etc)	Type of planting: <input type="checkbox"/> Commercial <input type="checkbox"/> Garden <input type="checkbox"/> Other:
Acreage or number of plants affected:	Percentage of plants affected: <input type="checkbox"/> 100 <input type="checkbox"/> 75 <input type="checkbox"/> 50 <input type="checkbox"/> 25 <input type="checkbox"/> 10 <input type="checkbox"/> 1
How much of each plant is affected?	Tillage system: <input type="checkbox"/> Conventional <input type="checkbox"/> Min. till <input type="checkbox"/> No-till <input type="checkbox"/> N/A
Are other kinds of plants similarly affected? What types? <input type="checkbox"/> Yes <input type="checkbox"/> No	
When did you first notice symptoms?	
Plant parts affected: <input type="checkbox"/> Leaves <input type="checkbox"/> Stems <input type="checkbox"/> Roots <input type="checkbox"/> Twigs <input type="checkbox"/> Large branches <input type="checkbox"/> Buds <input type="checkbox"/> Flowers <input type="checkbox"/> Trunk <input type="checkbox"/> Fruit	
Symptoms: <input type="checkbox"/> Yellowing <input type="checkbox"/> Bleeding <input type="checkbox"/> Wilted <input type="checkbox"/> Canker <input type="checkbox"/> Deformed <input type="checkbox"/> Red <input type="checkbox"/> Galls <input type="checkbox"/> Drop <input type="checkbox"/> Stunting <input type="checkbox"/> Decayed <input type="checkbox"/> Dead spots <input type="checkbox"/> Dead <input type="checkbox"/> Other:	
What were weather conditions the previous week?	

Fertilizers, herbicides, insecticides, or fungicides applied: <i>(Please list type, amount, and date of application.)</i>	
Watering schedule:	Type/Method of irrigation:
Rotation history/Plants grown previously in this soil:	
Type of soil: <i>(Please check all that apply, e.g. sand + loam = sandy loam.)</i> <input type="checkbox"/> Sand <input type="checkbox"/> Silt <input type="checkbox"/> Loam <input type="checkbox"/> Clay pH (if known): _____	Drainage: <input type="checkbox"/> Good <input type="checkbox"/> Fair <input type="checkbox"/> Poor
Distribution: <i>(Check all that apply.)</i> <input type="checkbox"/> Single plant <input type="checkbox"/> Scattered plants <input type="checkbox"/> Groups of plants <input type="checkbox"/> Most of field <input type="checkbox"/> On slopes <input type="checkbox"/> In low areas <input type="checkbox"/> Field margins <input type="checkbox"/> Associated with tillage/cultural practices/chemical treatments	
Age/Size of plant(s):	When were specimens planted in the present location?
Other information:	
How quickly did the problem appear?	Does the problem appear to be spreading? <input type="checkbox"/> Yes <input type="checkbox"/> No
Illustrate or describe the pattern of damage.	
What do you think is wrong?	

Collecting Specimens for Diagnosis

Please send as much of a typical diseased (not dead) plant, including roots, as possible. Dig up the entire plant where practical. Do not pull it up, since pulling may remove diseased roots. Send the roots and surrounding soil and the attached tops. Wrap the roots in a plastic bag to prevent dirt from contaminating leaves and stems, then place the entire sample in a second plastic bag without additional moisture. Try to send several plants or plant parts that show the various stages of the problem. Include a healthy plant, a plant showing the early stages of the disease, and a plant that is severely affected. It is better to send too much of a specimen than too little. Tree diseases can usually be diagnosed only from isolations made at the junction of diseased and healthy tissue. Include live twigs or limbs just showing symptoms. Send samples in a plastic bag.

Packaging

Each specimen should be individually wrapped/bagged and accurately labeled. Place the group of wrapped specimens in a sturdy container. To prevent damage en route, plants (especially potted ones) must be fastened securely in the container. Identify the package inside and out.

Filling Out the Form

Answer questions as completely as possible, providing as much detail as you can. The plant diagnosticians who make the diagnoses have to depend on you to know how the disease looked at the site when the sample was taken. Place the completed form in an envelope (address below) and attach it to the outside of the package containing your samples.

Issued by Washington State University Extension and the U.S. Department of Agriculture in furtherance of the Acts of May 8 and June 30, 1914. WSU Extension programs and policies are consistent with federal and state laws and regulations on nondiscrimination regarding race, sex, religion, age, color, creed, and national or ethnic origin; physical, mental, or sensory disability; marital status or sexual orientation; and status as a Vietnam-era or disabled veteran. Evidence of noncompliance may be reported through your local WSU Extension office. Trade names have been used to simplify information; no endorsement is intended.
